Maheen Wahid

MERN Stack Developer · Software Engineer

maheen.1wahid@gmail.com LinkedIn GitHub Karachi, Pakistan

SUMMARY

MERN stack developer who designs and deploys scalable backend APIs and the React interfaces that sit on top of them. Experience across health-tech, fintech, and cryptocurrency, including role-based authentication, AWS S3 file services, recurring billing, dynamic PDF reporting, third-party SDK and AI integrations, cron-based automation, and blockchain integration with Ethers.js. Has supervised project delivery, works well in a team, and brings a consistent can-do approach to unfamiliar domains.

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Ant Design, Bootstrap, responsive UI, Chart.js, ApexCharts
Backend	Node.js, Express.js, Fastify, REST APIs, JWT authentication, role-based access control, Sequelize ORM, cron jobs, workflow management
Databases	MySQL, MongoDB
Integrations	JasperReports, Agora, Ethers.js, FaceHeart, MX Merchant, Klaviyo, SendGrid, AWS S3, Google Maps API
Tools & delivery	Puppeteer, WinSCP, Docker, CI/CD pipelines, AWS services, Postman, JasperStudio, Claude, Cursor

EXPERIENCE

Software Engineer · Evantagesoft (Pvt) Limited

2024–Present

Karachi, Pakistan · MERN Stack (Frontend + Backend)

- Designed and deployed scalable backend APIs with authentication, role-based access, token verification, and middleware-level authorization.
- Integrated MX Merchant recurring billing and built secure AWS S3 file upload and download APIs.
- Integrated JasperReports with Node.js for dynamic PDFs, designing reports in JasperStudio with MySQL as the data source.
- Implemented cron-based scheduled processing and built React listings, CRUD workflows, dashboards, and admin portals.
- Integrated FaceHeart and Agora SDKs; contributed to a cryptocurrency platform using Ethers.js.
- Delivered across multiple client platforms—three with a team and two independently—and supervised delivery on one project.

Frontend Developer Intern · MangoTech Solutions

4 months

Remote

- Built and maintained responsive React interfaces as part of a remote frontend team, working with reusable components and API-driven views.

SELECTED PROJECTS

Donation4All

Fundraising platform for constituent data, recurring giving, invoices, receipts, events, role-based users, and multilingual donor reporting.

Know.us

At-home diagnostics and wellness platform; worked on access control, result processing, protected PDF reports, QR logic, and SDK integrations.

BabyReveal

Customer and admin portals for test orders and results, OTP, camera capture, payments, scheduled Agora meetings, and feedback.

Meezan DigitalVerse

Admin and user panels for cryptocurrency transactions, beneficiary management, authentication, KYC, and treasury workflows.

JasperReports Services

Reusable Node.js services rendering dynamic result and transaction PDFs from database queries for multiple platforms.

TMS

React admin dashboard for scheduling, data management, analytics visualization, and spreadsheet export.

Antoxicate & getTestd

Related health-testing platforms sharing APIs, admin portals, scheduled jobs, reports, result imaging, and patient notifications.

Procurement & Branch Affairs

Inventory and procurement workflows with role-based permissions, approvals, gate passes, and auditable asset movements.

Result Image & Accession Services

HTML-to-image rendering and cloud delivery; scheduled, authenticated accession-number assignment for laboratory workflows.

EDUCATION & RECOGNITION

BS Software Engineering · UBIT, University of Karachi — CGPA 3.61 / 4.0 · 3rd position

Intermediate · Government Degree College, Malir Cantt — Grade A+ · 80%

Matriculation · Little Master's School System — Grade A+ · 89%

Position holder in a speech competition and awarded a certificate for a poster competition organized by the National Accountability Bureau (NAB).
